elliptic and, to a lesser extent, parabolic partial differential operators. Equations that are neither elliptic nor parabolic do arise in geometry (a good example is the equation used by Nash to prove isometric embedding results); however many of the applications involve only elliptic or parabolic equations.

In some situations, these modeling lead us to partial differential equations, the most common type of are, elliptic, parabolic, and hyperbolic equations. These equations play a substantial role in understanding problem related to flow, heat motion of free fall body and at microscopic level motion of electron by using Schrodinger equation.
